

Release Workflow

Future releases are planned in [Roadmap](#).

Steps:

1. Create release branch (see [Gitflow Workflow](#))
2. Send out email to clowder@lists.illinois.edu
3. Update version number in the following files:
 - a. CHANGELOG.md
 - b. project/Build.scala
 - c. doc/src/sphinx/conf.py
4. Test and fix bugs on release branch
5. Make pull request against master
6. Review mongodb updates
7. Merge pull request
8. Tag master with version number
9. Merge master into develop
10. Check auto-deployed instances
11. Build Sphinx documentation and deploy
12. Update landing page
13. Send out email to clowder@lists.illinois.edu
