

WT Recorded Runs

The screenshot displays the WholeTale web interface for a recorded run. The browser title is "WholeTale". The page header shows "LIGO Tutorial" and a menu with options: Save, Metadata, Publish, Enable Editing, Configuration, Run, and Stop. The interface is divided into several sections:

- Files:** A file browser showing a directory structure with folders for Home, Tmp, Data, and Workspace. Under the Workspace folder, two files are listed: notebook.ipynb and run.sh.
- Versions:** A list of five versions of the notebook, all dated "Tue Nov 12, 2019" with different times. The most recent version is expanded to show a "Results" section.
- Runs:** A list of five runs, identical to the versions list. The most recent run is expanded to show a "Results" section.
- Main Content Area:** A large text area containing two paragraphs of text:
 - Paragraph 1: "A paragraph of text with an [unassigned link](#)."
 - Paragraph 2: "A second row of text with a [web link](#)"
- Line Numbers:** A vertical list of numbers 1 through 5, corresponding to the lines of text in the main content area.
