2020-01-10 Meeting notes

Date

10 Jan 2020

Attendees

- Luigi Marini
- Maxwell Burnette
- Michael Lambert
- Shannon Bradley
- Rob Kooper
- Todd Nicholson

Discussion items

Item	Who	Notes
Clowder Newsletter	Shannon Bradley	Just about ready to release Draft: https://emails.illinois.edu/newsletter/255746.html
Brown Dog Support	Shannon Bradley	redirect support emails to Clowder email per Kenton but there are only Clowder (which go to the whole group) and Clowder-Admin need a plan - clowder-support? clowder-announce? ask for registrants ■ support question in slack needing attention please - send curl/swagger and bdcli info ■ Here is the documentation for the api https://bd-api.ncsa.illinois.edu/ here is the bdcli readme https://opensource.ncsa.illinois.edu/bitbucket/projects/BD/repos/bdcli/browse How do we deal with projects that have expired and how do we support them? take to technology group?
Attendees /Webinar	Luigi	will be getting more external participants soon Webinars - we will be picking dates and hopefully getting more new participants Promoting - make better text? share - include calendar invite - Bytes and Pieces (Wed) Ideas for Presentations: (notes: from 11/22 - 2019-11-22 Meeting notes) Make a wiki page for this - Extractor Parameters - AWS setup and Clowder vs Kubernettes - Clowder setup in Kubernettes - Permissions and Configuration Settings (Permissions Roles and Spaces) - Config Parameters that change behavior of the app - Enabling and Triggering Extractors - How to develop new previewers and relations to extractors - core extractors readme - this is an example - see this for other ideas - previewers don't have to be in core - make a previewers core by itself - an old view used to show previewers - not in menu (previewers/list) 2.0 Roadmap Please add more Not up on You Tube yet
2.0	Todd and Max	working on 2.0

	Max	downloading big reports - timeout
		• is clowder login cookie expiring? tested - not the issue • downloading with curl - 1 hr 13 mins 14 sec - closed with outstanding read data existing - but there was a full line in the excel report • may be missing more files in the report • mongo timeout? • error in specific record? • Rob will directly query to see how many records and look at specific records where it is stopping Signup link on a space • request access link • access only appears if enable public is true • adtl logic - if logged in as user and have role it does #1 ... if you don't it does request access • will post on issue suggestion for how logic will change to make needs possible after enabling public
PRs	Mike	code to review and test - Todd has so far ... Max will next Luigi would like to do a patch release Bing's migration scripts for AWS still in PR is still out there too
