

2019-07-03 Brown Dog Meeting notes

Date

03 Jul 2019

Attendees

- Yan Zhao-
- Sandeep Puthanveetil Satheesan -
- Luigi Marini -
- Shannon Bradley -
- Mark Fredricksen -
- Rob Kooper - absent
- Kenton McHenry - absent
- Gregory Jansen - absent
- Dukyun Nam - absent
- Deren Kudeki

Discussion items

Time	Item	Who	Notes
		Yan	<p>What is the progress on this?</p> <p>finish the extractor, send an email for questions I have</p> <p>some issues to discuss:</p> <ol style="list-style-type: none">1. TODO: add folders as what is on clowder (need to use API instead of pycloswer)2. TODO: use clowder tags as HydroShare keyword?3. I am using description as abstract on HydroShare, what if the dataset has abstract metadata?4. I didn't make the resource public/ shareable/ discoverable, because: <p>some issues for them:</p> <ol style="list-style-type: none">1. What is the resource type? What are the options besides "Generic"?2. How to set the time zone? I update the resource at 11:48am CDT, but it shows 4:48 p.m.3. hs.resource(resource_id).files.all() returns python Response, not the list of files or files' information. Is that expected?4. On the webpage, where can I view a file's extra_metadata ?5. I am trying to set file metadata with hs.resource('ID OF RESOURCE GOES HERE').files.metadata(FILE_ID, params) <p>How can I get the FILE_ID? Or the FILE_ID is the file path?</p>
		Sandeep	
		Mark	<ul style="list-style-type: none">• All the extractors on dev were timing out. Spent time on research to figure out that Clowder on bd-clowder-dev should be restarted. This fixed the timeout issues.• Transformations catalog has been started on dev, but still is having issues with database connection.• Started going through the VM setup to get the ArcGIS VMs migrated to the new hypervisor.
