

Farm Doc Project

A web-based farm program analysis tool to assist farmers, academics, and policymakers to understand programs and policies surrounding the Farm Bill.

Roadmap

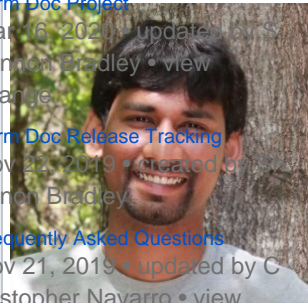

The work plan/milestones for development to provide a better understanding of the entire project will be inserted here.

About this project

This project will:

1. Deliver a policy analysis tool that generates program payment estimate outputs at various geographical levels.
2. Create a web-based dashboard for payment estimate outputs determined by data input and model (developed at #1 above) simulations, including simulations based on user-directed changes to Federal program parameters.
3. Include a dashboard that visualizes options such as mapping payments at county, regional (including Congressional district), state and national levels.

The team
