

2020-07-31 Clowder Meeting notes

Date

31 Jul 2020

Attendees

- Luigi Marini
- Rob Kooper
- Maxwell Burnette
- Michael Lambert
- Mark Fredricksen
- Bing Zhang
- Shannon Bradley

Discussion items

Who	Notes
Luigi Marini	<ul style="list-style-type: none">• Pushed some commits to 2.0 progress• Reached the 10000 messages on Slack• Add extractors depends on which version of Clowder
Bing Zhang	<ul style="list-style-type: none">• Improving script to extractor notification to slack<ul style="list-style-type: none">• Send notification only once a day if everything is fine• Send success after failure
Maxwell Burnette	<ul style="list-style-type: none">• Two PRs open<ul style="list-style-type: none">• Rabbitmq monitoring tool<ul style="list-style-type: none">• GET file/:id<ul style="list-style-type: none">• returns 500 if id is wrong (fix)• return 403 if api key is wrong• Pycrowder<ul style="list-style-type: none">• use internal IP instead of public• 2.0 commits<ul style="list-style-type: none">• different code to serialize JSON• Is there a way to have multiple implicit conversion for different versions of the output
Michael Lambert	<ul style="list-style-type: none">• Cleaned up PR on JOB_ID in extractors<ul style="list-style-type: none">• Change data in UI to "No Job ID" for those that don't have it and in popup explain what that means• Need to figure out how to do
Mark Fredricksen	<ul style="list-style-type: none">• Needs reviews for the Transformation catalogs• Users having permission issue with volume<ul style="list-style-type: none">• On Linux permissions of folders in container don't match users id in OS• Mounting volume from home directory will have different permissions• Mark Fredricksen will update docs for users who want to mount external directors Linux
Rob Kooper	<ul style="list-style-type: none">• Don't use latest tag in docker. Use explicit versions.<ul style="list-style-type: none">• Docker will not re-pull a container if marked at latest• Docker swarm will use the sha as extension on it to make sure that they run the same version on each node• Kubernetes always pull down latest• We should start building extractors by importing pycrowder using pip and not starting with pycrowder<ul style="list-style-type: none">• Update documentation• Upgrade old extractors<ul style="list-style-type: none">• When we move extractors to github?
