Workbench + MHD

Notes

- MHD dataset is currently available via Globus on BW
- Data has been transferred to SDSC and stored in OpenStack/Swift
- Globus does not currently support Swift
- We have notebook from SC16 (maybe lost more recent draft)

Question:

- What is the best way to expose the MHD dataset to be useful?
- Can we use WB (i.e., via Jupyter notebook)
- What to do about Globus/Swift (wait for Swift support)
