

Legend graphics URL of WMS layer

The Legend graphics URL of WMS layer can be found at the setting of WMS layer at Geoserver

For example, here is a layer setting at layers.js in GLTG

```
"properties": {  
  "title": "River Reaches",  
  "id": "gltg:gltg-pools",  
  "wms": "https://gltg.ncsa.illinois.edu/geoserver/wms",  
  "opacity": 0.9,  
  "checked": false,  
  "showLayerLegend": false,  
  "layerLegendTitle": "",  
  "layerLegendContents": ""  
}
```

In geoserver, get in "layers" setting (you can find it in the left side menu as shown below).

Additional Styles

Available Styles

You can see a graphic image under "default style: gltg:pool". Right click on the image and copy the URL (in chrome, "copy image address").

The URL of the legend for the layer is as below:

<https://greatlakestogulf.org/geoserver/wms?REQUEST=GetLegendGraphic&VERSION=1.0.0&FORMAT=image/png&WIDTH=20&HEIGHT=20&STRICT=false&style=gltg:pool>

If the legend graphics is needed to be modified, you need to edit a style called, "gltg:pool".
