# **2018-04-24 Meeting notes**

#### Date

24 Apr 2018

#### Attendees

Marcus Slavenas

### Goals

## Done items

Item	Notes
daylight hours	<ul> <li>use: https://api.sunrise-sunset.org</li> <li>use lat average of max lat and max long</li> <li>didn't get exact matches to CD_Daylight.csv</li> <li>For illinois climate div 1 in 2016-01-02</li> <li>CD_Daylight - 9.228 hours</li> <li>api 9.21194444444</li> <li>api avg first week 9.25753968254</li> <li>2016-07-22</li> <li>14.736</li> <li>14.6977777778</li> <li>14.635</li> <li>probably good enough, but could try centroid method</li> <li>also could try averaging by week</li> </ul>
endpoints	<ul><li>get_weather, fet_forecast</li><li>get cdc week, get cdc date (using db)</li></ul>
model interface working	still needs generalization and graphing
other state climate divs added	

# Todo/Notes:

Item	Notes
fortran compiler	<ul> <li>marcus using gfortran</li> </ul>
