2018-05-29 - ISDA Team - Stand-up Meeting Notes

This is a short week - so let's make it count!

Example of good Documentation 🙂 - Central Park's lampposts contain a set of four numbers that can help you navigate.

The first two tell you the nearest street, and the next two tell you whether you're closer to the east or west side of the park (even numbers signal east, odd signals west).
