

Extraction Messages 2.0

*** More info to come ***

Goal: update RabbitMQ message payload to simplify and clarify how events are defined.

Related to: [Register Extractors by Space](#).

Proposed new JSON payload:

Event

```
{ "id": "xyz",
  "created": "2018-06-03...",
  "type": "added",
  "source": {
    "id": "xyz",
    "type": "file",
    "mime": "image/jpg"
  },
  "target": {
    "id": "xyz",
    "type": "dataset"
  },
  "user": {
    "id": "foo@bar.com",
    "provider": "cilogon"
  },
  "routing_key": "dataset.file.added",
  "params": {
    "foo": "bar"
  }
}
```
