

# 2018-11-26 - Brown Dog Design Meeting

Attendees:

- [Yan Zhao](#)
- [Sandeep Puthanveetil Satheesan](#) - absent
- [Bing Zhang](#) - abstent
- [Ben Galewsky](#)-
- [Luigi Marini](#) -
- [Kenton McHenry](#)- absent
- [Rob Kooper](#) - absent
- [Gregory Jansen](#) - absent
- [Shannon Bradley](#) -

Confluence Page for planning: [High Level Priorities](#)

Review Design Topics: [Design Topics](#)

Last week in review:

Discussion:

Time	Person	Topic
	Ben	Box  Something has happened to Ben's Box Skills Account  Working with Box Admin team to correct  Ben will be starting on Logging  Currently also deploying human pref
	Yan	Pecan- have box to enter brown dog token  LDAP implementation  Luigi would like extractor in service for CZO next if possible
		CZO - hit again next week when Bing is back
	Luigi	PR in forwarding user keys in extractors  GUI doesn't know what user key is - will create if it doesn't exist
	Greg	There are no real updates since last week on my end, having been on holiday most of that time.  I am planning to run another round of Brown Dog tests over the winter break here, when some other things that demand CPU and i/o get done.  These new tests will be shared through newly public dashboards (Grafana), so that's an improvement.  Right now I am working on two other deadlines, a Drastic presentation at CNI (Coalition for Networked Information) and a local priority related to backups.
