Compressed Metadata List View

For files and datasets, we offer the option for the user to add metadata fields to their resources.

Design Mockups

Current Implementation

Currently, the view appears as a sort of "Activity Stream", showing the history of all metadata entries added in chronological order with newer entries appearing first.

Initially, files that have no metadata attached appear like this:

	erncsa.illinois.edu/c	lowder/files/56	8d9e1da2bce981bc2	273		Clowder		
CI	lowder	You 🔻	Explore ▼	Create 🔻	Selections V	Help 🔻		Q ¥ <u>2</u> ¥
	er Name > My Data	File						Type: imoge/ong File size: 1938 kB File location:
	Download De	ns Comments	Submit for extraction	<u>n</u>			Basic Advanced	Statistics View: 2 Last viewed: Dec 13, 2018 14:13:41 Dewnloads: 1 Last commloaded: Nov 27, 2018 12:44:34 License Type: All rights reserved Holder: User Name Edit
				No metodota ovale	able for this resource			Dataset containing the file hy Dataset Select a Dataset Tags ▲ Tag
Power	red by Clowder (0.0	1.0#developmen	t branch:unknown sh	a1:unknown)				4

Once metadata is added, it appears in the "Activity Stream" area below:

	ncsa illinois.edu/c	lowder/files/56	8d9e1da2bce981bc2	.73		Clowder					
Clo	wder	You 🔻	Explore V	Create ▼	Selections ▼	Help 🔻			Q V	₽ ▼

Powered	l by <mark>Clowder</mark> (0.0	.0#developmen	t branch:unknown she	at:unknown)							"

Proposed Implementation

The initial view before any metadata is added would likely not need to change at all:

					Clowder		
	edu/clowder/files/5	68d9e1do2bce981bc	273				
Clowder	You 🔻	Explore ▼	Create 🔻	Selections V	Help 🔻		• ▼ <u>9</u> ▼
User Nome > M Ad a descry Downloar	Dataset > My File y File	Submit for extraction		Selections V	Help V	Basic Advorsed	Type: imagon/ong File star: 193.843 File location:
			No metadata avait	ble for this resource			Dataset containing the file Hy Delaset Select a Dataset Tags Tags
Powered by Clowd	(0.0.0#developme	nt branch:unknown sh	a1:unknown)				

With metadata present, the user is offered two possible methods of visualization, either Cards or Table.

Cards View

With the Cards view selected we see a similar view to the current Clowder, with some minor changes:

multiple values assigned to a metadata field are aggregated and condensed onto a single card
 the user can edit existing or delete values for each metadata field (individually)

Modification History

This view can also offer the "Last Modified" modal, where appropriate.

Clicking on the "last modified" link can open a modal window showing the history of the metadata field in question.

Hovering or clicking on a highlighted keyword in this modal, such as Edited or Deleted (as shown), will give context into which of the (possibly) multiple value was deleted or edited:

Table View

With the **Table** view selected, we compresses the list of cards down into a shorter series of entries, with the hopes that (in most cases) all of the metadata would fit on a single screen.

As you can see, this design can fit many more entries into the same space, but may be more difficult for a novice user to digest at first-glance:
