

# 2019-04-17 Brown Dog Meeting notes

## Date

17 Apr 2019

## Attendees

- Yan Zhao - absent
- Sandeep Puthanveetil Satheesan -
- Luigi Marini -
- Shannon Bradley -
- Mark Fredricksen - vacation
- Rob Kooper -
- Kenton McHenry - vacation
- Gregory Jansen -
- Dukyun Nam
- Deren Kudeki -

## Discussion items

New version of tools catalog is still a focus to release

Time	Item	Who	Notes
		Shannon	Box blog released and tweeted and picked up by HPC Wire <a href="#">NCSA Brown Dog and Box Skills Speed up Astronomical Research</a> - copied to the Brown Dog blog Twitter Stats on Brown Dog Post <ul style="list-style-type: none"><li>• Impressions<ul style="list-style-type: none"><li>◦ times people saw this Tweet on Twitter 1,073</li><li>◦ Total engagements 13</li><li>◦ Likes 3</li><li>◦ Link clicks 3</li><li>◦ Detail expands 3</li><li>◦ Profile clicks 3</li><li>◦ Retweets 1</li></ul></li></ul>
		Sandeep	<ul style="list-style-type: none"><li>• Started development on Green index extractor for images - hoping to complete by Friday.</li><li>• Haven't made much progress on Box skills refactoring</li><li>• Schedule a meeting with Louisville collaborators on how to use command line tools</li></ul>
		Mark	vacation
		Deren	Worked on getting feature extractor to work Demo <a href="https://sites.google.com/site/partofspeechhelp/home/vbd_vbn">https://sites.google.com/site/partofspeechhelp/home/vbd_vbn</a>
		Luigi	<ul style="list-style-type: none"><li>• Clowder 1.6 released</li><li>• University of Louisville Green Index / Matt Browning partnership<ul style="list-style-type: none"><li>◦ look at links of relevant technologies share by their team</li><li>◦ sent email with plan to support them</li></ul></li><li>• Met with Dr. Nam related to deep learning tasks and plan moving forward. Reviewing tentative plan drafted by Dr. Nam.</li><li>• Working on presentation of Clowder extractors for Rokwire team</li></ul>
		Rob	Updating machines that are running Ubuntu 12.04 - EOL end of month - will include Brown Dog
		Greg	

	Dukyun Nam	<p>reviewing info from Luigi</p> <p>Proposal - work plan for extractor for extractor for pavement analysis</p> <p>set up env</p> <p>ran simple extractor - didn't work - but understands rabbit mq</p> <p>looking into tensor flow models in GitHub - object detection API</p> <p>related to Deep Learning - SMU use case - large dataset of images in City of Dallas - pictures of pavement - they are labeled - build a model that if it gets a new picture - what is condition of pavement (can he use pictures for training)</p> <p>There is another project here where student is looking at cracks in pipes can be looked at - Luigi will give info</p> <p>used Amazon Deep Learning Service - uses tensor flow under the hood</p> <p>Meeting tomorrow at 2:00 with Barbara</p>
--	------------	---

## To Dos - Tasks
