

2019-09-06 Clowder Meeting notes

Date

06 Sep 2019

Attendees

- [Shannon Bradley](#) -
- [Luigi Marini](#) - absent
- [Rob Kooper](#)
- [Sara Lambert](#)
- [Bing Zhang](#)
- [Sandeep Puthanveetil Satheesan](#)
- [Maxwell Burnette](#)
- [Mark Fredricksen](#) -
- [Todd Nicholson](#) -with guest from Clara's team - 4SEAD - Ciao Yang

Goals - Technical Meeting

- 1st Friday of Month will be webinar open to anyone with the link (will be on the Clowder main website).
- Other 3 weeks will be technical meeting for developers to discuss code, planning, etc.
- Will start inviting more people - and we can send link to people on individual basis for invitation
- CSSI - we now have some funding to pay for hardening of Clowder outside of work done by project specific work

Discussion items

Item	Who	Notes
	Maxwell Burnette	<p>Screenshare</p> <ul style="list-style-type: none">• Scrolling improvement - adding permissions - showing how many search results exist vs able to display - just avoided by adding endless scroll and a comment that some results may be hidden because of permission<ul style="list-style-type: none">◦ explicitly say skipped X number because you don't have permission• Reindexing - make async by implementing a index queuing system<ul style="list-style-type: none">◦ If elastic search is down right now - that index now gets dropped◦ Now that thread will run when it comes back
	Rob Kooper	<p>Bug in elastic search - tags right now are indexed the same way everything else is - if there is a space it is split into two pieces</p> <p>"Cats are cute" is split into 3 pieces - should the tag be a whole unit or should a tag be splitable</p> <p>discussion</p> <ul style="list-style-type: none">• tokenizer• search for token not search for contains = Cats should match Cats only ... and Cats are cute would only return Cats are cute• would not match Are cats cute?• Should actually show in the interface with quotes around it• Restrict users to a drop down list of existing tags• Elastic search has specific search syntax protocol <p>auto complete and API to merge two tags</p> <p>what about matching CamelCase? case insensitive?</p> <p>Put input in ticket 1020 -  CATS-1020 - error with tags in elasticsearch TO DO</p> <p>search box is a different entity than Tags</p>
