- Mark Fredricksen

Discussion items

Who	Notes
Luigi Marini	• Moved sphinx documentation to readthedocs and changed deployment process • Other updates to 2.0 branch on GitHub • Focus on improving documentation updates • Try to keep 2.0 stable and work on broken stuff with tagged -alpha version as last compile-able version • 1.10.0 and 1.10.1 bugfix releases
Shannon Bradley	New releases and move to Git-Hub tweeted

Mark Fredricksen	• Transformation Catalog can use basic authorization with local Clowder users
	• Flask error handlers have been added.
	  ◦ Still adjusting how errors should be responded to.
	  ◦ Basic page can show error message with Transformation Catalog header.
	  ◦ May show home page, just listing error above the transformations.

Maxwell Burnette	• Adoption of RDA Interoperability Recommendations • Opened some issues from Design Documents on Confluence • Working through proposals for new features to check for similar
Sara Lambert	• Extraction groupings by job ID in GUI
Rob Kooper	• Work on GitHub builds • Swagger version control
