Date

28 Aug 2020

Attendees

- Luigi Marini
- Maxwell Burnette
- Sara Lambert
- Todd Nicholson absent
- Bing Zhang absent
- Mark Fredricksen
- Michael Bobak
- Rob Kooper
- Elizabeth Yanello
- Sandeep Puthanveetil Satheesan absent

Discussion items

Who	Notes
Luigi	<ul style="list-style-type: none">• Clowder 1.11.0 in the works - New release is almost ready• Migration of Michigan instance to Tacc -• Please pay attention to the Clowder slack channel• Reviewed Catalog PRs (not done) - It's looking good• 2.0 meeting and MongoDB salat migration - Slowly moving but updates are being made
Mark	<ul style="list-style-type: none">• PR's for the catalog made, not ready to merge yet. If an error is raised we need to put a header so that 404/503 error doesn't pop up• Will do a blog post or put together a YouTube video for Transformations Catalog
Rob	<ul style="list-style-type: none">• HELM install Clowder. HELM Charts contain containers making it easy to get it up and running. Upgrades are easy to do as well.• Rob's / NCSA's Helm charts can be found here: https://github.com/ncsa/charts
Mike L.	<ul style="list-style-type: none">• Heavy backlog grooming and sprint planning for Industry• Added acceptance criteria / estimates for catalog work• Filled in technical gaps for Extractor Catalog design with new stories/tasks - should I make a blog post? Luigi: make a blog post PR against the website. Link the wiki page. It may migrate to github at some point.<ul style="list-style-type: none">◦ Please feel free to give Mike L. feedback on the Extractor Catalog• Prioritized epic based on technical requirements/dependencies
Max	<ul style="list-style-type: none">• Working with Todd on 2.0. Has client update merged.• Making a pyClowder 3 which will make it easier to use PyClowder• As part of CSSI and Syngenta, adding to elastic search. Found a lot of search bugs that we're working on. If we want to use <code></></code> searches we have to do a re-index. Elastic searches need to be able to detect numbers from text values in the string. Use this as a string with <code></></code> rather than a numeric value. Perhaps we should remove the <code></></code> command. We need to figure out how to allow people to define a field for searches so the field returns what they want. Is there a way to use JSON?• As part of what Alex has talked about, we would like to add date ranges to the API.
Todd	
Bing	
Mike B.	Got new repo & tools, so I can start looking at it next week, will be following the slack more as well.
Sandeep	
Shannon	<ul style="list-style-type: none">• Is there anything that should be added to the twitter channel?• Have there been any seminars/webinars lately that need to be added to YouTube? Luigi - Not yet.

Lisa	<ul style="list-style-type: none">• Nothing to report
------	---

☒ Action: Lisa set up meeting with Max & Rob to discuss Pull Requests
