

# 2020-12-04 Clowder Dev Meeting notes

## Date

04 Dec 2020

## Attendees

- Luigi Marini
- Maxwell Burnette
- Sara Lambert
- Todd Nicholson
- Bing Zhang
- Mark Fredricksen
- Michael Bobak
- Rob Kooper
- Elizabeth Yanello
- Sandeep Puthanveetil Satheesan - absent
- Shannon Bradley

## Discussion items:

Next Webinar January 2021?

Upcoming Venues for Clowder/

| Who       | Notes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Luigi     | <ul style="list-style-type: none"><li>• <a href="https://github.com/clowder-framework/clowder/releases/tag/v1.13.0">https://github.com/clowder-framework/clowder/releases/tag/v1.13.0</a> released. Need to make the blog page announce it. There are many new features.</li><li>• Rob, Luigi, Todd are setting up the PDG instance on Radiant thanks to Rob's awesome terraform scripts and tech. Lots of interesting things to learn.</li><li>• Hoang Nguyen from the University of Queensland will be our newest contributor. He works in material science and learned about Clowder through 4CEED.</li><li>• Michael Johnson has contributed his first PR to the core. Thank you! - <a href="https://amplitude.com/">https://amplitude.com/</a></li><li>• Updates for steering committee next week?</li><li>• Please let everyone know when a bug is fixed so that they know we are paying attention.</li></ul> |
| Max       | Productive 2.0 meeting. Checking datasets do not show, but will fix this today.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Mike L.   | Been in discussions about tracking geometrics into one dashboard. Uptime Robot/Slack/Grafana/Amplitude/Google Analytics have all been used, but looking for a single place to view the data collected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Todd      | <ul style="list-style-type: none"><li>• bug fix for deleting tags</li><li>• setting up clowder and extractors on new Radiant allocation</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Michael J | Rob walked through the upgrading process specific to SIMPL.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Bing      | <ul style="list-style-type: none"><li>• add notification to Clowder-test, we have options to do email, Slack, MS team notification of Clowder test results.</li><li>• share the draft design of Clowder website statistics collection. It would be interesting to collect a couple of statistics data, e.g., uptime, average response time, the number of users login, etc.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
