- [Luigi Marini](#)
- [Maxwell Burnette](#)
- [Sara Lambert](#)
- [Todd Nicholson](#)
- [Bing Zhang](#) - absent
- [Mark Fredricksen](#)
- [Michael Bobak](#)
- [Rob Kooper](#)
- [Elizabeth Yanello](#)
- [Sandeep Puthanveetil Satheesan](#)
- [Shannon Bradley](#)

Discussion items:

Next Webinar January 22 or 29?

Upcoming Venues for Clowder/

Who	Notes
Luigi	Need to write a blog post for the latest release. There are a few PR's that need to be done.
Max	<p>I have four PR's out there: initial implementation; Delia will never show as "done" only as "submitted". We should request that we build a "done" category for them.</p> <p>RDA PR working with Jim Myers do a round robin test on this.</p>
Mike L.	<p>SIMPL Platform: need to test/discuss the extractor logging to graylog.</p> <ul style="list-style-type: none">• For example, image-preview has logs, but image-metadata does not.• Similarly, opendronemap.stitcher has no logs.<ul style="list-style-type: none">◦ We are outside of growing season, so that could explain why there is no log data for the stitcher. 🍌 <p>Included a whiteboard drawing on the design wiki to show what we're planning for Clowder's Centralized Event Sink:</p>  <ul style="list-style-type: none">• Orange indicates an existing system component or interaction• Blue indicates something new that will need to be added or developed
Todd	<p>Working on a branch and need Maxwell Burnette to take a look at this. Users may want to make selections and save their "favorites" . Is this different from "collections"? Discussion ensued.</p> <p>We want to make sure that favorites or wish lists do not get confused with collections.</p>
Michael J	YAML type file to list of extractors to convert it to something that deployable. If you look at the HELM chart you can make a docker composer.
Bing	absent

Mike B.	<p>=EarthCube:</p> <ul style="list-style-type: none"> ·check on main, extended demo site ·using endpoint needs DOI mapping to use LD cache/s · started to get more..., but might not be needed ·Got some search css, &a responsive filter demo ·found re-query plans, seeing how that might work ·got larger plan/coordination started, but details to pin down · will get more SPARQL, as it will probably be needed/used <p>http://datadiscoverystudio.org/geoportal/</p>
Rob	Nothing to report. We need to discuss what to do with Brown Dog.
Sande ep	absent
Mark	reasonable change in the read.me file. Put into Python I'll put in a PR for the read.me. Put a note that this needs to be cleaned up and others can look at it as well. Mark will put together a wiki with an explanation of how to put this together.
Shannon	Does anyone have a good topic for an article in the newsletter next year?
Lisa	<ul style="list-style-type: none"> • Topics for January webinar: Geoserver (Todd), PDG (Todd), Extractors in PyCharm (Todd); Extractor Test (Bing), EarthCube (Mike B.), Extractor Catalog (labels) (Mike L), Github Actions for Extractors (Rob K) How to de-bug docker (Rob) • Planning for Conferences: Possible Upcoming Venues for Clowder

Action Items/To Dos:

- ☐ [Elizabeth Yanello](#)Talk with Anna L. about Permafrost and deadlines for submission t conference.
- ☒ Shannon Bradley January newsletter
