- Rob Kooper
- Michael Johnson
- Sandeep Puthanveetil Satheesan
- Chen Wang
- Elizabeth Yanello absent
- Kathryn Naum

Agenda:

- Advertise 1.18.0 release
- Re-write as we migrate
- Annual Report

Discussion items:

Who	Notes
Luigi	absent
Max	https://github.com/clowder-framework/clowder/discussions/260 - Extractor permission handling. Would like people to share feedback. Email SIMPL re: date "contains" query not working (range works, date fixing will require UI fixes most likely) Saw Lisa and Summer's presentation yesterday - redesign and cleanup resource pages and front landing page. All looks really good. Summer is moving on to a FT job. How to adopt InDesign files into Clowder is an open question. Doing something like this could be part of a broader redesign. Lisa and Summer will share in next week or so.
Mike L.	absent
Todd	opened another PR, something re indexing. Just a small issue.
Bing	na
Mark F	absent
Mike B.	Notebook launching feature - in old search right now
Rob	
Michael J	Developing new repo to stress/load testing Clowder instances using Locust: https://github.com/clowder-framework/stresstest. Still private.
Sandeep	absent
Chen	Demo'd a completely separate React frontend combining with Play. Technical details. Separate front end and back end but look into changing end points we are using

Katie	na
Lisa	absent

Action Items/To Dos:
