2021-09-17 Clowder Dev Meeting notes

Date

17 Sep 2021

Attendees

- Luigi Marini
- Maxwell Burnette
- Sara Lambert
- Todd Nicholson
- Bing Zhang
- Michael Bobak
- Rob Kooper
- Michael Johnson
- Sandeep Puthanveetil Satheesan
- Chen Wang
- Elizabeth Yanello absent
- Kathryn Naum absent

Agenda:

- Radiant Tiers Meeting Update
    - Meeting with Business Office
- Clowder Service Model
- Migration

Discussion items:

2.0 discussion mostly presented by Luigi, Todd, Max.

Who	Notes
Luigi	▪ merged many PRs. ▪ Clowder 2.0
Max	▪ next week, plan to demo the workbench integration extractor. explained how it is set up
Mike L.	▪ has been reviewing grid view PR, seems to be stringifying JSON in a way that causes high counts, left comments. we can do release now and fix this after merge. Luigi: look at the tile being used and make sure there aren't additional changes we need to make (see app/views/files/tile.scala.html)
Todd	▪ updating PR for the space bytes count, then ready for review
Bing	absent
Mike B.	
Rob	• Fixed auto-deploy problem in industry cluster (yay base64 encoding!)
Michael J	absent
Sandeep	absent

Chen	- Created pro/cons list for frontend of Clowder for 2.0. - PROS - simultaneous development of back and frontend, not as tightly coupled. Easier to implement new design from scratch vs. modifying current view. - REQUIREMENTS - need auth piece, may need JWT or similar token for this for separate frontend. - Previewers - rewriting was cleanest vs. wrapping or porting. Some are easier to duplicate than others. - For missing api endpoints or missing parameters or missing content response, need a smooth workflow for doing that. Overall like separate frontend.
Katie	absent
Lisa	absent

Action Items/To Dos:

- [x] Elizabeth Yanello set up meeting to discuss tiers prior to meeting with the business office
