Agenda:

Clowder 2.0 Breakdown of prioritization

Service Model Update (Business Office Meeting)

Slack Channel for Internal Use

Discussion items:

Luigi talked about 2.0 and wants all to show exactly what they are working on so that we are all on the same page with the code and language in these meetings.

Not everything needs to be working before we merge since we will all be working on this re-build.

Discussion of API

Chen is running the javascript test. Is ready to merge. Do we want to use type script? Using React is just a javascript. Flow and type script somewhat overlap so we need to decide whether or not to use it.

<https://www.npmjs.com/package/better-docs>

<https://www.npmjs.com/package/prop-types>

Mike L and Kastan believe that typescript may be our best option after the learning curve is reached. Mike finds scala more difficult to use than typescript and javascript.

Can we leverage Minio with other versioning?

Discussion of downloads and uploads - removing Clowder as the middleman?
