

AmeriFlux Meeting notes for 2022-07-27

Date

\$currentDateLozenge

Attendees

[Yong Wook Kim](#)

[Bethany Blakely](#)

[Rob Kooper](#)

[Minu Mathew](#)

[Taylor Pederson](#)

Agenda

- Running other sites
 - new templates created using EddyPro
- Running PyPluxPro error on L2
- Check ALB values :
 - Currently

```
met_df['ALB'] = met_df[albedo_col].apply(lambda x: 1 if float(x) > 1 else float(x) * 100)
```

```
if albedo_col > 1 : put 1.  
else : put albedo_col * 100
```

```
I think this should be changed to :  
if albedo_col > 1 : put 100.  
else: put albedo_col * 100.
```

Conclusion : to change all albedo values > 1 and <0 to -9999. >0 and <=1 set to albedo_col * 100.

Action items
