

SMM meeting notes 10/19/23

19 Oct 2023

Chen Wang Yong Wook Kim

Status check

- Twitter paid plan - (Chen) haven't done it yet
- Radiant security issue - (YWK) all good
- Email link PR- (YWK) help testing

TODOs:

- [Gateways slides](#) -70% done (Chen)
- SMM repo reorganization - Draft PR waiting for Email PR to be merged first (YWK)
- SMM usage monitoring - Initial Google Analytics project set up(YWK)
 - See if we can move to illinois account
 - See if project can be shared to multiple people
 - If need to add tag to html, here is the landing page repo: <https://github.com/IllinoisSocialMediaMacroscopic/smmlanding.github.io>
- Autophrase and autophrase extractor (Chen) need to rewrite, combine and clean up a bit)
- **Github actions**
 - SMILE server
 - GitHub action for smm-analytics
 - only Main branch update push to Docker.io; others push to github. `dockerpush` logic see example here: <https://github.com/clowder-framework/smm-extractor/blob/main/.github/workflows/docker.yml#L68C12-L68C12>

Debugging

SMM extractors once delete never came back. It is not only related to SMM extractors; same things are happening to other extractors on Clowder Demo instance.

So far we found:

1. extractor info is deleted in mongodb
2. heartbeat seems to be alive
3. suspecting it's not writing extractor info back to the mongodb

Logistics:

- Radiant upgrade 10/25 need to keep an eye out
- Coordinate travel next Sunday
