Format Breadth DAP Test Profile

Goal: Randomly samples the CI-BER collection for diverse formats. Tries each conversion operation that is offered for a formats. Finds formats that have no conversions or where conversion have issues.

Included operations:

file spec	size	number	operation	arguments	notes
.		1000	convert	output=*	Testbed will need a way to get a good spread of distinct formats..

Results:

Record outcome of each operation. Also record the situation where no conversions are offered for a given format.
