

# Chrome Extension for DTS

The source code for the chrome extension for the DTS can be found in

<https://opensource.ncsa.illinois.edu/bitbucket/projects/BD/repos/bd-chrome/browse>

To build the extension from source code (Link to google chrome documentation on packaging):

- OS X

```
/Applications/Google\ Chrome.app/Contents/MacOS/Google\ Chrome --pack-extension=path/ to/ dtsextension directory
```

It will generate two files dtsextension.crx and dtsextension.pem (private key).

In future if you want to update/build the extension again then use the following command:

```
/Applications/Google\ Chrome.app/Contents/MacOS/Google\ Chrome --pack-extension=/path/to/dtsextension --pack-extension-key=/path/to/dtsextension.pem
```

- Linux

*Same as Mac OS, except for the path to Google Chrome application will change*

- Windows

```
chrome.exe --pack-extension=C:\myext --pack-extension-key=C:\myext.pem
```

The current built of chrome dts extension is deployed in

<http://browndog.ncsa.illinois.edu/chrome/>
