

# The Brown Dog Tools Catalog

The [Brown Dog Tools Catalog](#) will serve as a means to both collect new [conversion/extraction](#) tools from the community while simultaneously serving as platform for finding and preserving such tools. We have populated the Tools Catalog with a handful of the Medici extractors and Polyglot conversion scripts to get it started:

Adding a new tool is a simple matter of registering the tool along with a very simple wrapper script that will allow either the DAP or DTS to make use of it. Below we show an example adding scripts to make use of [PEcAn](#) for ecological model conversions:
