

2015-03-02 Standup Meeting notes

Date

02 Mar 2015

Who	Monday - Planned	Friday - Accomplished
Jason	<ul style="list-style-type: none">Brown Dog monthly reportMonitor Brown Dog progressUpdate sprints w/LuigiSeveral once a month meetings this week	<ul style="list-style-type: none">Monthly report went out63 remaining BD itemsReviewed NIST proposalPrepared for next round of 1-1 meetings
Liana	<ul style="list-style-type: none">Finish up river extractorRe-start work on handwritten numbers extractorPossibly update extractors (will wait for json-ld sprint tasks to be over for this one)	<ul style="list-style-type: none">Sent email to Qina, Kenton, Jong about the current state of the extractor with current sample resultsLooked into new samples for the handwritten number extractor - still need to find a good collection for testing it
Rob	<ul style="list-style-type: none">Fix deployment of dev machinesPresentation openstackAdd BrownDog to PEcAn.	<ul style="list-style-type: none">dev machines now running tests, most tests passing.presented openstack, next step quotescreated extractors for audio, image, video and pdf. each extractor will create a thumbnail image, preview image and a preview version of the file.Started work on inserting BrownDog in PEcAn.
Edgar	<ul style="list-style-type: none">Work on new ideas for the MSC projectContinue working on DFDL schema for MSC spreadsheetsWork with new PEcAn script and develop its Browndog wrapper.	<ul style="list-style-type: none">New report with all subjects for the MSC was produced<ul style="list-style-type: none">the report was sent to Melisa for distributionwaiting for commentsWinning familiarity with DFDL<ul style="list-style-type: none">Beginning to think it will be hard to accomplish it using DFDLSome old Jira tasks were closed.
Sande ep	<ul style="list-style-type: none">Complete fixing merge conflicts with branch MMDB-1455Setup person detector on extractor-0014 VMFix video display issue in GordonFix extractor crashing issue in Gordon (continuation from previous week)Complete work on integrating person tracking and person detection	<ul style="list-style-type: none">Will complete fixing merge conflicts in branch MMDB-1455 todayInstalled required software and completed setting up person detector on extractor-0014 VMWorked on fixing video display issue in Gordon. Have created ticket for Gordon admins to update ffmpeg installation.Completed integrating person tracking and person detection... Created a person tracking extractor. That's a yay!
Kenton	<ul style="list-style-type: none">BD 18 Month Review scriptFinish tools catalog deploymentbd-wget	<ul style="list-style-type: none">Started wiki for demo scripts (followed up with others in regards to getting info needed)Bug fixes/features to Tools CatalogPopulated Tools CatalogMade YouTube videos of usage of Tools Catalog and added to Blog

Smruti	<ul style="list-style-type: none"> • Json-Id sprint • Use-case service • Chrome-extension UI 	<ul style="list-style-type: none"> • Created the ability to add/query/remove contexts for Json-Id metadata as part of the Json-Id sprint. This includes case classes, declaration context service, MongoDB service implementation, API controllers, unit test and integration test. • Installed necessary software for writing DAP service for CZ use case and started writing the service • In order to make Chrome-extension UI persistent, tried using background page instead of event page. But still it is not working. Needs to look into more details as how the communication between background page and popup.html works.
Inna	<ul style="list-style-type: none"> • Json-Id sprint • DownloadAs button for chrome extension 	<ul style="list-style-type: none"> • Json-Id sprint: writing to db - done • Json-Id sprint: reading from db - done (except for content) • DownloadAs button - started
Luigi	<ul style="list-style-type: none"> • IMLCZO development and deployment • SEAD development and wrapping up sprint • Browndog development and wrapping up 2 sprints • Earthcube Geo identification of technical requirements from use cases • Present on SEAD and Medici for other dibbs project • GLTR pull requests 	<ul style="list-style-type: none"> • Fixed bugs with comments in medici and cleaned up layout • Continued development for SEAD sprint • Prepared Medici presentation for CSL Dibbs group • Merged pull requests for medici and geodashboard • Fixed bug with hot deployment of imlczo geodashboard
Michal	<ol style="list-style-type: none"> 1. Find daily (hourly, 5 minutes) temperatures for Stickney for 2005-12, MWRD-142 2. create T table in the Database, MWRD-143 3. add daily average T to the dashboard, MWRD-145 4. start NEXRAD workflow in DataWolf 5. look at NetCDF Java for direct conversion of NEXRAD data format to 1) png and 2) Stickney value 	<ol style="list-style-type: none"> 1. I have daily for the entire time interval and hourly for 2010 for O'Hara 2. Change the script, done 3. added rest end point 4. started, in progress 5. started, in progress
Chris	<ul style="list-style-type: none"> • ERGO/NIST - Discuss next steps with Jong, focus on JIRA tasks for 4.0 release • CyberSEES - implement REST calls from flow table editor to save updates to the worldfile • MSR - attend NFIE meeting, waiting for feedback from Fernando on bugfix 	<ul style="list-style-type: none"> • Ergo - fixed summary table reports, fixed RCP launcher to work with both Kepler and Luna, reviewed pull requests, reviewed Ergo text, general code cleanup • CyberSEES - flow table editor commits changes via REST service • MSR - attended NFIE, still awaiting feedback on DataWolf bug fix
Dave		<ul style="list-style-type: none"> • Followed up with 3 use-case teams, documenting issues still needed to discuss • Prep for BD 18 month review - followup with UMD, NSF • Made progress on employee evals • BD - youtube videos, tweet
Rui	<ul style="list-style-type: none"> • BD JSON-LD sprint item (BD-435) • Earthcube development 	<ul style="list-style-type: none"> • JSON-LD sprint: demoed to Luigi of a per-user approach, he suggested a global + per-user combo approach. Finally finished the item, and created a pull request. • Earthcube: had a project meeting. Nailed down more concrete feature requirements. • The JSON-LD item took most of this week. Next week need to work more on Earthcube.
