

NDS Labs Web Interface

Jujucharms GUI

The screenshot displays the Jujucharms GUI in a web browser. The browser's address bar shows the URL <https://demo.jujucharms.com/?text=>. The page header includes the Juju logo, a 'Sandbox' tab with a count of 1, and links for 'More' and 'Get started'. The main interface is divided into a left sidebar and a central workspace. The sidebar contains a 'Services | Machines' tab, a search bar labeled 'Search for Charms', and a list of 'Added Services (2)' and 'Popular (19)' charms. The 'Added Services' list includes 'neutron-open...' (Deployed 10506 times, trustworthy, Recommended) and 'nova-cloud-co...' (Deployed 20628 times, trustworthy, Recommended). The 'Popular' list shows 'rabbitmq-server'. The central workspace features a service diagram with two components: '(mediawiki)' and '(mysql)'. The '(mediawiki)' component is represented by a blue square icon with a yellow sunburst, and the '(mysql)' component is represented by a blue square icon with a white fish. A vertical scrollbar is visible on the right side of the workspace. The bottom of the interface shows a status bar with '5 changes' and buttons for 'Import', 'Export', and 'Commit'.
