Document	Priority	Notes	Assignee	Reviewer	Status	Related Link(s)
Official NDS Domain	High					☒ NDS-156 - Official site changes CLOSED
		Footer: Move Github so that it's the first link under "NDS Project Resources"	PR/Kandace			
		What should NDS Provide: Broken link to NDS Services Diagram (behind protected area in Wiki?)	PR/Kandace			
		Pilot projects: Add descriptions for: SBGrid, NIST (materials registry/curation), Pragma projects.	PR/Kandace			
		Get Involved - Remove Trello link - Move Github to first position	PR/Kandace			
		Labs: Implement edits from Revised NDS Labs Content	PR/Kandace			
		Pilot application If we are going to maintain both the Workbench registration and pilot application, we'll need to update the pilot application. - Distinguish from Workbench - Remove labsportal link.	PR/Kandace			
		Open questions/Undecided "Get Involved" and top menu contain links to page to subscribe to mailing list – including discuss. We need to decide whether "discuss" will continue to be used. - News is really out of date - Do you have to have an approved pilot to access the Workbench? (Open question for TAC/Steering committee) - Pilots need to use Workbench to come up with the pilot idea - Workbench is one of the many services offered by NDS Labs 2 cases: explore (pre-pilot test drive), develop (pilot) - Pre-pilot = NDSC member, RDA member? - We need NDSC developers that are not pilot members to have access to contribute tools - Pilots need more resources (e.g., PRAGMA) – outgrow Workbench - Workbench has two services: test drive and developer

NDS Labs	Kenton	Archive given new content? https://nationaldataservice.atlassian.net/wiki/display/NDSC/NDS+Labs Kenton: Lets keep this as this is the dev wiki for planning and documenting activities specific to Labs. Perhaps should add a note making this clear. Most of the work here may be in better organizing NDS Labs Design Documentation where most of the material is at.
NDS Labs Overview	Kenton	Archive? Moved under NDS Labs Design Documentation
NDS Labs Architecture	David	Out of date, needs to be updated and should be moved to official Wiki
NDS Labs API	Craig	Out of date, should be archived and a link to the actual API documentation included on official Wiki
NDS Labs Web Interface	Kenton	Out of date, should be archived Kenton: Moved under NDS Labs Design Documentation
NDS Labs Examples	Kenton	Out of date, should be archived Kenton: Moved under NDS Labs Design Documentation
NDS Labs Service Specification	Craig	Out of date, should be archived, already links to ndslabs-specs repo.

NDS Labs Test Cases	Craig	Maybe archive? If already included in Mike's test plans
NDS Labs Design Documentation	All	Keep, still valid. Could be reorganized.
Developer Workflows	Mike	Keep, still valid.
Glossary	Mike	?
Pilot architectures	Craig	TBD. Possibly move to official Wiki. Or maybe this is just useful for me
Towards Developer and Development Groups	David	Mockups for developer support, should be archived or moved to design Kenton: Moved under NDS Labs Design Documentation
Concepts for Developer Support	David	Mockups for developer support, looks like duplicate Kenton: Moved under NDS Labs Design Documentation
Beta Release	Craig	Beta release features, can be archived since this already exists on official Wiki
NDS Share	Kenton	Keep
