# 2016-06-16 Planning

Capturing notes from an earlier planning discussion: things we need to talk about

1. Volumes (NDS-261, NDS254, NDS-178 depend on this
   a. How will we use OS/GFS volumes for Beta release? 1 big shared volume or per project or something else?
   b. Do we need a Gluster API server? Quota or full admin
2. LMA(O)
   a. How do we monitor our own services (Nagios) - -should also think about SLA/support
   b. Should revisit LMA in Kubernetes – what will we use, do we need auth, etc
3. Account approval/registration
4. Feedback
5. Google Analytics/performance monitoring/usage analysis (related to LMA)
6. Developer support
7. Service catalog organization
8. Testing and test infrastructure
9. Recommender service
10. External resources (Roger, XSEDE)
11. Versioning
