

CSS Styles for panels

There are css classes to customize the panels for datasets, collections, spaces and files.

For adding the a border color to the panels, we have added the following classes and corresponding files below

Class Name	Files
.collection-panel	collections.tile, collections.listitem, collections.listchildcollections, home (Following Collections)
.dataset-panel	datasets.tile, datasets.listitem, home (Following Datasets)
.space-panel	spaces.tile, spaces.listitem, home (Following Spaces)
.file-panel	file.tile, file.listitem, home (Following Files)
.folder-panel	folder.listitem, curations.listFolder

For adding a background to the footer of panels in the tiles (the section where the counts are). You can use the classes below. And they are referenced in the corresponding files.

Class Name	Files
.collection-panel-footer	collections.tile, home (Following Collections)
.dataset-panel-footer	datasets.tile, home (Following Datasets)
.space-panel-footer	spaces.tile, home (Following Spaces)
.file-panel-footer	file.tile, home (Following Files)

You can also add a background to the title of a space, dataset, collection and files using the following classes:

Resource Type	Class Name
Collection	.collection-title
Dataset	.dataset-title
Space	.file-title-div
File	.space-title
