

2016-10-07 Retrospective

Date	07 Oct 2016
Participants	Kandace Turner Sara Lambert Kenton McHenry Craig Willis David Raila

Retrospective

What did we do well?

- Getting stuff done
- Working together as a team
- Less tension
- More effective
- Listening, hearing, and offering help
- Implementing notion of weekly or bi-weekly builds (a release process)
- Jack integration

What should we have done better?

- Use "best effort" - commit to best effort for an exploratory/open ended task. Stop after the committed time and then re-evaluate. Much bigger than I thought, this is what I learned - table for later or readjust committed items if still a priority
- Stuff gets pulled in - as a team review what gets pulled in and agree on priority (this will take place on an as needed basis)
- Put more effort into design -more effort on thinking through things

Actions

- ☐ Continue to use Jack for the stand-ups
- ☐ Have a "Lessons Learned" after NDSC6
